PROJECTS

Solar Geeks Online Store

A multi-page ecommerce web app with API integration. Users can explore products, register new accounts, and navigate between tiled and table views for an enhanced user experience. The app offers full shopping cart functionality, user authentication, and mobile optimization, with a focus on component communication, Vuex datastore, and Vue Router.

Read-It Developer Forum

A full-stack web application hosting community discussions on software development topics. Features include API integration, asynchronous programming with Promises, and navigation across six distinct views using Vue Router.
